Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Election/Restrictions

Applicant's election of Group I, claims 1-25 and 37-39 in the reply filed on February 14, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 12-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Hanke '297.

There is disclosed in Hanke a cooking utensil, comprising: a base 10 having an interior surface including a lower portion forming a cooking surface; a detachable, angled handle 18, 22 providing a pistol-type gripping portion, the handle being two exchangeable handles; a pivotal connection 15 providing a handle attachment on the cooking vessel; an interior handle lock 20; and a handle release device 21.

Claims 15-21 and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Wang.

There is disclosed in Wang a cooking vessel, comprising: a base 10 having an interior surface including a lower portion 11 providing a main cooking surface; an upper

Art Unit: 1761

portion 12', 12" on the interior surface, the upper portion being textured differently than the main cooking surface, the texture being a pattern of elongate recesses or grooves 25, 29 which form dimples 24, 27; and an angled handle 15 attached to the vessel. Wherein the textured surface has a higher coefficient of friction due to the pattern of grooves or recesses formed therein.

Claims 22-24, 37 and 38 are rejected under 35 U.S.C. 102(b) as being anticipated by Eimerman.

There is disclosed in Eimerman a cooking vessel, comprising: a base portion 19; at least two interchangeable handles 10, 10a (see figures 1, 1a) attachable to the vessel, and one of which handles 10 is an elongate, angled gripping handle, and the other handle 10a is a serving handle that does not extend as far from the vessel; a predetermined attachment point 18 at which the handles can be attached or detached, the predetermined attachment point is also functionable as a permanent handle; a safety release 34 to prevent inadvertent release of the handle; and an interior handle lock 22.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5 and 7-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hanke '297 in view of Wang.

Art Unit: 1761

Hanke, as discussed above, discloses the claimed subject matter except for a textured food retention surface above the main cooking surface.

Wang, as discussed above, discloses a textured cooking surface including the texture being a pattern of elongate recesses or grooves 25, 29 which form dimples 24, 27.

It would have been obvious to one skilled in the art to provide the cooking vessel of Hanke with the retention surface taught in Wang, in order to allow for the separation of food items during a cooking process.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hanke '297 in view of Hung.

Hung discloses the use of a detachable casserole-style handle 1 or elongate handle 3.

It would have been obvious to one skilled in the art to substitute one of the handles of Hanke with the casserole-style handle disclosed in Hung, in order to provide an alternative handle arrangement.

Allowable Subject Matter

Claim 39 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Graj et al., Hanke '860 and Lemme et al. are cited for their disclosure of the state of the art.
